

GUIDELINES FOR MANUSCRIPTS

delta-K is a professional journal for mathematics teachers in Alberta. It is published to

- promote the professional development of mathematics educators, and
- stimulate thinking, explore new ideas and offer various viewpoints.

Submissions are requested that have a classroom as well as a scholarly focus. They may include

- personal explorations of significant classroom experiences;
- descriptions of innovative classroom and school practices;
- reviews or evaluations of instructional and curricular methods, programs or materials;
- discussions of trends, issues or policies;
- a specific focus on technology in the classroom; and
- a focus on the curriculum, professional and assessment standards of the NCTM.

Manuscript Guidelines

1. All manuscripts should be typewritten, double-spaced and properly referenced.
2. Preference will be given to manuscripts submitted on 3.5-inch disks using WordPerfect 5.1 or 6.0 or a generic ASCII file. Microsoft Word and AmiPro are also acceptable formats.
3. Pictures or illustrations should be clearly labeled and placed where you want them to appear in the article. A caption and photo credit should accompany each photograph.
4. If any student sample work is included, please provide a release letter from the student's parent allowing publication in the journal.
5. Limit your manuscripts to no more than eight pages double-spaced.
6. A 250-350-word abstract should accompany your manuscript for inclusion on the Mathematics Council's Web page.
7. Letters to the editor or reviews of curriculum materials are welcome.
8. *delta-K* is not refereed. Contributions are reviewed by the editor(s) who reserve the right to edit for clarity and space. **The editor shall have the final decision to publish any article.** Send manuscripts to Klaus Puhlmann, Editor, PO Box 6482, Edson, Alberta T7E 1T9; fax 723-2414, e-mail klaupuhl@gyrd.ab.ca.

Submission Deadlines

delta-K is published twice a year. Submissions must be received by August 31 for the fall issue and December 15 for the spring issue.

MCATA Mission Statement

Providing leadership to encourage the continuing enhancement of teaching, learning and understanding mathematics.

Volume 37, Number 2

June 2000

COMMENTS ON CONTRIBUTORS

Ed Barbeau is a professor of mathematics at the University of Toronto, Toronto, Ontario, and he runs the Olympiad correspondence program of the Canadian Mathematical Society. He is also on the board of the Ontario Association for Mathematics Education, the professional organization for mathematics teachers in Ontario.

Daryl M. J. Chichak is the Grade 6 mathematics assessment specialist with Alberta Learning and the Alberta Learning representative and membership director on the MCATA executive, Edmonton, Alberta.

David E. Dobbs is a professor of mathematics at the University of Tennessee, Knoxville, Tennessee.

David R. Duncan is a professor of mathematics at the University of Northern Iowa, Cedar Falls, Iowa.

Richard T. Edgerton is a science resource teacher with Seattle Public Schools, Seattle, Washington.

Brenda Healing teaches at Bentley High School, Bentley, Alberta.

Victoria R. Jacobs teaches in the Center for Research in Mathematics and Science Education at San Diego State University, San Diego, California.

Art Jorgensen is a retired junior high school principal from Edson, Alberta, and a longtime MCATA member.

Thomas E. Kieren is a professor of education (emeritus) in the Faculty of Education, Department of Secondary Education, University of Alberta, Edmonton, Alberta.

Murray Lauber is a professor in the Division of Mathematical Sciences at Augustana University College in Camrose, Alberta.

Terri-Lynn McLeod teaches at Bonnyville Centralized High School in Bonnyville, Alberta.

Bonnie H. Litwiller is a professor of mathematics at the University of Northern Iowa, Cedar Falls, Iowa.

Kay McClain teaches methods courses for preservice teachers at Vanderbilt University, Nashville, Tennessee. She also teaches middle school mathematics in conjunction with her research on students' statistical understandings.

Sandra M. Pulver is a professor of mathematics at Pace University in New York.

Sol E. Sigurdson is a professor of education (emeritus) in the Faculty of Education, Department of Secondary Education, University of Alberta, Edmonton, Alberta.

Sandra L. Takis teaches advanced placement statistics at Yorktown High School in Arlington, Virginia.
