SOME PUZZLES TO PONDER

CALGARY MEETING OF NCTM

Join the hundreds of teachers from across Canada and the United States who will congregate in the foothills city for the province's first NCTM meeting - the third to be held in Canada.

These words, quoted from the brochure prepared by the Publicity Committee under the chairmanship of L.C. Pallesen, past president of MCATA, are of utmost importance to all members of the Mathematics Council.

Plan now to be in Calgary on August 25, 26, and 27. This is an opportunity you cannot afford to miss.
