

PROPOSED PROGRAM OF THE MCATA FOR 1966-67

1. To review and purchase the latest films in mathematics; to organize inservice training, using these films; to make available the Mathematics 341 film series.
2. To establish better liaison among university personnel, teachers and students; to arrange for visits by faculty members to schools; to facilitate the interchange of ideas between universities and schools.
3. To provide assistance and suggestions for mathematics exhibits in mathematics-science fairs; to produce a booklet, listing sources of information and materials for mathematics exhibits.
4. To establish a mathematics competition for inter-school teams.
5. To advise and assist in the development of programs in continuing education.
6. To encourage the formation of new regional councils and to give more assistance to them.
7. To inform teachers of new developments in mathematics education in the province.
8. To organize seminars for the summer of 1967 in three levels - elementary, junior high, and senior high.
9. To review Department of Education examinations in Grade IX and Grade XII mathematics with a view to making recommendations regarding future examinations.
10. To produce a manual on how to organize a mathematics society in a school, with suggestions for programs, activities and contests.
11. To continue the publication of the *Annual* and the *Newsletter*; to make available other publications pertaining to mathematics education.
