

Making Math Make Sense in the Primary Classroom

A. Craig Loewen

Monograph No. 10 February, 2000

*How many different
ways can you find to
arrange exactly 24
blocks into columns
and equal sized rows?*

- Objective
- Activity
- Representation
- Problem-solving
- Adaptations
- Writing Corner

Journal of the Mathematics Council of
the Alberta Teachers' Association

Making Math Make Sense

in the Primary Classroom

Table of Contents

	Page
1. Understanding Mathematics Some Ways of Knowing	1
2. Manipulatives Are Powerful Mathematical Models	2
3. Problem Solving Is More than Just Solving Problems	5
4. Writing Activities In the Mathematics Classroom	7
5. Using this Monograph	9
6. Activities for Number Strand	
• Number Concepts	10
• Number Operations	22
7. Activities for Patterns & Relations Strand	
• Patterns	27
8. Activities for Shape & Space Strand	
• Measurement	32
• Three-Dimensional & Two-Dimensional Shapes	49
• Transformations	54
9. Activities for Statistics and Probability Strand	
• Data Analysis	56
• Chance & Uncertainty	62
10. Problem Solutions	64
11. Duplication Masters	
• Calendars	70
• Numberboard (0-100)	73
• Blank Spinner Mats	74
• Card Deck	75
• Base Ten Blocks	80
• Pattern Blocks	81
• Money Manipulative	87
